

ABC XYZ

Generative AI / Python Engineer

Delhi, India | abc.xyz@email.com | +91-90000-00000 | github.com/abcxyz

PROFESSIONAL SUMMARY

Generative AI and Python Engineer with 2+ years of experience developing AI-enabled applications, Python backend services, REST APIs, RAG workflows, and data-processing solutions. Hands-on experience with Python, SQL, FastAPI, Flask, Generative AI, LLMs, RAG, embeddings, semantic search, prompt engineering, LangChain, LlamaIndex, Hugging Face, Docker, Git, AWS, and CI/CD. Experience building AI workflows, evaluating LLM responses, and integrating AI services with business applications.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript

Generative AI: Generative AI, Large Language Models (LLMs), Prompt Engineering, RAG, Embeddings, Semantic Search, AI Agents

AI Frameworks: LangChain, LlamaIndex, Hugging Face

Backend & APIs: FastAPI, Flask, REST APIs, API Integration

Data: Pandas, NumPy, ETL, Data Processing, Data Pipelines, PostgreSQL

Cloud & DevOps: AWS, Docker, Containerization, Git, GitHub, CI/CD, GitHub Actions

Platform: Kubernetes

AI Quality: LLM Evaluation, AI Evaluation, Response Quality Testing

Tools: Postman, VS Code, Jupyter Notebook

PROFESSIONAL EXPERIENCE

XYZ Infotec Pvt. Ltd. – GenAI / LLM Engineer | Jan 2025 – Present

- Developed Python-based Generative AI workflows for document understanding, information extraction, and operational automation.
- Built backend services and REST APIs using FastAPI and Flask for AI-enabled internal applications.
- Implemented RAG workflows using LangChain, embeddings, semantic search, retrieval strategies, and LLMs.
- Designed prompt templates and evaluation test cases to improve consistency, relevance, and response quality.
- Built prototype AI-agent workflows for multi-step information retrieval and task automation.
- Processed structured and unstructured datasets using Pandas, NumPy, SQL, ETL, and data-pipeline workflows.
- Integrated third-party APIs and enterprise data sources and used Postman for API validation.
- Containerized Python services using Docker and supported deployment workflows on AWS.
- Worked with Git, GitHub, GitHub Actions, and CI/CD practices for application builds and deployment support.
- Supported Kubernetes-based application environments and collaborated with engineering teams on reliable AI application delivery.

ABC Digital Labs – Python Developer Intern | Jun 2024 – Dec 2024

- Developed Python utilities and REST API integrations for internal automation tools.
- Created SQL queries and data-processing scripts for operational reporting.
- Built Streamlit dashboard prototypes and integrated API-based data sources.
- Used Git, GitHub, Postman, and Jupyter Notebook during development and testing.

PROJECTS

AI Resume & Job Match Analyzer | Python, Flask, Gemini, NLP, RAG, Chart.js

- Built an AI-powered application that analyzes resumes against job descriptions and generates an ATS compatibility score.
- Implemented skill extraction, normalization, exact/partial/missing

classification, and weighted scoring.

- Added LLM-based experience and project evaluation plus an AI career chat assistant using resume and job-description context.
- Created an interactive dashboard showing ATS score, skill coverage, experience fit, project fit, and improvement recommendations.
- Designed prompt evaluation test cases to compare response quality and improve AI-generated recommendations.

Enterprise Knowledge Assistant | Python, LangChain, LlamaIndex, Embeddings, Vector Search, FastAPI

- Developed a RAG prototype for retrieving relevant information from enterprise documents.
- Created document-processing and embedding workflows with semantic retrieval and REST APIs.
- Experimented with an AI-agent workflow for multi-step document question answering.
- Evaluated retrieval and response quality using representative test cases.

EDUCATION

Bachelor of Technology – Computer Science & Engineering | ABC University | 2024

CERTIFICATIONS

- AWS Cloud Practitioner
- Database Foundations
- Introduction to Cybersecurity

ADDITIONAL INFORMATION

Target roles: Generative AI Engineer, LLM Engineer, AI Engineer, Python Backend Engineer.
